

INNOVATE

1. What you need to do?

The students of a University helps it grow and flourish. CUJ needs you to come up with your ideas and propose an integrated energy, waste and water management plan for the university.

A small scale example is being given for your better understanding

For Example: Installation of panels on auditorium rooftop for overcoming the power shortage problems faced in events organized in the auditorium, proper drainage system of waste generated from the canteen etc.

Note: Adding these points to your project idea won't earn you extra point.

2. How to present?

- A report containing detailed description of your idea
- PowerPoint presentation to express your idea
Time allotted: 10 mins. Including 2 mins for Q&A session
- Report & presentation should contain following :
 - Your main strategy for managing energy, water & waste
 - Cost Benefit Analysis, Investment, Payback
 - Possible sources of funding
- Group of 2- 4 students

3. Judgement

You will be judged on the innovations/ novelty & feasibility of your idea.

The decision of the judges will be final and not questionable.
